

CLARIS AROMA

YOUR SECRET INGREDIENT

The Aroma has been specially developed for the mineralization and taste optimization of coffee water. The addition of magnesium ensures optimal coffee taste extraction, while the integrated purification stage removes undesired off-flavors.

Ideally suited for pipe-connected coffee machines in soft water areas or after RO, Aroma is an ingredient you'll add to each cup of coffee to tailor your own signature flavour.

ONE CARTRIDGE, THOUSANDS OF SERVINGS

 Espresso	60'000 cups
 Cappuccino	60'000 cups
 Double Espresso	30'000 cups
 Americano	12'000 cups

* Number of serving cups is calculated based on the following assumptions for ml of brewed coffee: espresso = 30ml, cappuccino = 30ml, double espresso = 60ml, Americano = 150ml

- ▶ Active mineralization through magnesium
- ▶ Balanced coffee aroma even with water low on minerals
- ▶ Stable mineralization regardless of the line pressure
- ▶ Efficient reduction of harmful substances, chlorine and unpleasant odors
- ▶ Suitable for hot water applications with water hardness <math><5^{\circ}\text{dH}</math>
- ▶ High quality mineral salts from Europe with FDA approval
- ▶ Certified for food contact
- ▶ Independently tested by TUV to deliver consistent and stable mineralization throughout the whole lifespan of the cartridge
